& RUSSELL, P.C.

<b>Office Action Summary</b>	Application No. <b>09/502,986</b>	Applicant(s) <b>Wood et al</b>
	Examiner <b>Geoffrey Akers</b>	Group Art Unit <b>2164</b>

Responsive to communication(s) filed on Feb 11, 2000

This action is FINAL.

Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle 1035 C.D. 11; 453 O.G. 213.

A shortened statutory period for response to this action is set to expire 3 month(s), or thirty days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(a).

#### Disposition of Claim

Claim(s) 1-42 is/are pending in the application

Of the above, claim(s) \_\_\_\_\_ is/are withdrawn from consideration

Claim(s) \_\_\_\_\_ is/are allowed.

Claim(s) 1-42 is/are rejected.

Claim(s) \_\_\_\_\_ is/are objected to.

Claims \_\_\_\_\_ are subject to restriction or election requirement.

#### Application Papers

See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.

The drawing(s) filed on \_\_\_\_\_ is/are objected to by the Examiner.

The proposed drawing correction, filed on \_\_\_\_\_ is  approved  disapproved.

The specification is objected to by the Examiner.

The oath or declaration is objected to by the Examiner.

#### Priority under 35 U.S.C. § 119

Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).

All  Some\*  None of the CERTIFIED copies of the priority documents have been

received.

received in Application No. (Series Code/Serial Number) \_\_\_\_\_.

received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

\*Certified copies not received: \_\_\_\_\_

Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

#### Attachment(s)

Notice of References Cited, PTO-892

Information Disclosure Statement(s), PTO-1449, Paper No(s). 2

Art Unit: 2164

## **DETAILED ACTION**

1. Claims 1-42 have been examined.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1,9,11-12,15-18,21,23-24,26-30,34,36,38,42 are rejected under 35 USC 102(e) as anticipated by Maggioncalda(US Pat. No:5,918,217).

4. As per claim 1 Maggioincalda teaches a personal financial management software program for recording, predicting, and comparing financial data, comprising: a graphical user interface(col 2 lines 32-34) for creating, manipulating and displaying objects of object-oriented software programs and a current activity tool comprising objects for entering data from current financial transactions for recording purposes(col 2 lines 36-41) and a planning analysis tool comprising objects for entering projected financial data for a financial activity simulation(col 2 lines 44-47) and a budgeting analysis tool comprising objects for comparing current financial data with projected financial data(col 2 lines 47-col 3 line 42).

Art Unit: 2164

5. As per claim 9 Maggioncalda teaches a personal financial management software program according to claim 1, further comprising system interface objects to accept user preference defaults for use by the program tools(col 2 lines 33-34).
6. As per claim 11 Maggioncalda teaches a personal financial management software program according to claim 1, further comprising a to-do list displayed in the current activity tool for enabling the planning analysis tool to prompt the user to implement projected financial activity(col 17 lines 3-33).
7. As per claim 12 Maggioncalda teaches a personal financial management software program according to claim 2, further comprising account data from other financial programs imported into account objects(Fig. 3/310/320/330/350/340/360).
8. As per claim 15 Maggioncalda teaches a personal financial management software program according to claim 1, wherein the planning analysis tool comprises a financial activity simulation of all objects created by the user, the simulation modeling all financial activity from the earliest past date to the latest future date entered(col 2 lines 36-41)(col 8 lines 6-14)(Fig 3/340).
9. As per claim 16 Maggioncalda teaches a personal financial management software program according to claim 15, wherein the financial activity simulation identifies and graphically depicts discrepancies and shortfalls in the modeled transactions(col 9 lines 1-7)(Fig. 7a/715/720/710/705).
10. As per claim 17 Maggioncalda teaches a personal financial management software program according to claim 15, wherein the financial activity simulation is adjusted to eliminate

Art Unit: 2164

discrepancies and shortfalls, and to provide a more accurate fit with actual financial activity(col 14 lines 15-48).

11. As per claim 18 Maggioncalda teaches a method for recording, predicting, and comparing financial data using a personal financial management software program, comprising creating, manipulating, and displaying objects of object-oriented software programs by a graphical user interface(col 2 lines 32-34) and entering data from current financial transactions for recording purposes using objects of a current activity tool(col 2 lines 36-41) and entering projected financial data for simulating financial activity using objects of a planning analysis tool(col 2 lines 44-47) and comparing current financial data with projected financial data using objects of a budgeting analysis tool(col 2 line 47-col 3 line 42).

12. As per claim 21 Maggioncalda teaches a method according to claim 18, further comprising accepting user preference defaults by system interface objects for use by the program tools(col 13 line 59-col 14 line 3)(Fig 8/810).

13. As per claim 23 Maggioncalda teaches a method according to claim 18, further comprising enabling the planning analysis tool to prompt the user to implement projected financial activity by a to-do list displayed in the current activity tool(col 17 line 3-33).

14. As per claim 24 Maggioncalda a method according to claim 19, further comprising importing account data from other financial programs into accountobjects(Fig 3/310/320/330/350/340/360).

Art Unit: 2164

15. As per claim 26 Maggioncalda teaches a method according to claim 18, further comprising enabling the user to create and incorporate custom objects into the personal financial management software program(col 13 lines 49-58)(Fig 8/805).

16. As per claim 27 Maggioncalda teaches a method according to claim 18, wherein simulating-financial activity comprises simulating financial activity of all objects created by the user from the earliest entered date to the latest future date entered(col 18 lines 26-38).

17. As per claim 28 Maggioncalda teaches a method according to claim 27, wherein simulating financial activity further comprises identifying and graphically depicting discrepancies and shortfalls in the simulated transactions(Fig 7a/715/720/710/705)(Fig 7b/740).

18. As per claim 29 Maggioncalda teaches a method according to claim 27, wherein simulating financial activity further comprises adjusting objects to eliminate discrepancies and shortfalls, and providing a more accurate fit with actual financial activity(col 14 lines 15-48).

19. As per claim 30 Maggioncalda teaches a computer software program on a computer-readable medium incorporating the method recited in claim 18(col 6 lines 28-49).

20. As per claim 34 Maggioncalda teaches a personal financial management system for recording, predicting, and comparing financial data, comprising a graphical user interface(col 2 lines 32-34) for creating, manipulating and displaying objects of object-oriented software programs; a current activity tool comprising objects for entering data from current financial transactions for recording purposes(col 2 lines 36-41) a planning analysis tool comprising objects for entering projected

Art Unit: 2164

financial data for a financial activity simulation and a budgeting analysis tool comprising objects for comparing current financial data with projected financial data(col 2 line 47-col 3 line 2).

21. As per claim 36 Maggioncalda teaches a personal financial management system according to claim 34, further comprising system interface objects to accept user preference defaults for use by the program tools(col 13 line 59-col 14 line 3)(Fig 8/810).

22. As per claim 38 Maggioncalda teaches a personal financial management system according to claim 34, further comprising a to do list displayed in the current activity tool for enabling the planning analysis tool to prompt the user to implement projected financial activity(col 17 lines 3-33).

23. As per claim 42 Maggioncalda teaches a personal financial management system according to claim 34, wherein the planning analysis tool comprises a financial activity simulation of all objects created by the user, the simulation modeling all financial activity from the earliest past date to the latest future date entered(col 2 lines 36-41)(col 8 lines 6-14)(Fig 3/340).

*Claim Rejections - 35 USC § 103*

24. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2164

25. Claims 3,5-8,20 are rejected under 35 USC 103(a) as unpatentable over Maggioncalda(US Pat. No: 5,918,217) in view of Leon(US Pat. No: 6,052,673) and further in view of Minton(US Pat. No: 6,014,643).

26. As per claim 3 Leon teaches a personal financial management software program according to claim 2, wherein the account class comprises objects selected from the group consisting of bank account objects, credit account objects, investment account objects, loan account objects, and mortgage account objects(col 2 line 55-col 3 line 51).It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton and further in view of Leon to teach the above. The motivation for this is to teach a financial managment software program which has diverse object classes.

27. As per claim 5 Leon teaches a personal financial management software program according to claim 2, wherein the category class comprises an expense category class and an income category class(col 4 line 47-col 5 line 13)(Fig 1/16/20).It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton and further in view of Leon to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

28. As per claim 6 Leon teaches a personal financial management software program according to claim 5, with an expense category(col 5 lines 3-13)(Fig 1/18/20) wherein the expense category class comprises objects selected from the group consisting of subsistence expense objects(col 5 line 21), health expense objects, recreation expense objects, transportation expense objects, tax

Art Unit: 2164

objects, and luxury expense objects. It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton and further in view of Leon to teach the above. The motivation for this is to teach a financial management software program which has different object classes.

29. As per claim 7 Leon teaches a personal financial management software program according to claim 5, wherein the income category class(col 4 line 47-col 5 line 2) comprises objects selected from the group consisting of investment income objects, retirement income objects, and labor income objects. It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton and further in view of Leon to teach the above. The motivation for this is to teach a financial management software program which has different object classes.

30. As per claim 8 Leon teaches a personal financial management software program according to claim 2, wherein the template class comprises objects selected from the group consisting of scheduled spending template objects, scheduled income template objects, and loan payment template objects(Fig 1)(col 4 line 47-col 5 line 25). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton and further in view of Leon to teach the above. The motivation for this is to teach a financial management software program which has different object classes.

31. As per claim 20 Leon teaches a method according to claim 19, wherein the category class comprises an expense category class and an income category class(col 4 line 47-col 5 line 13)(Fig

Art Unit: 2164

1/16/20). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton and further in view of Leon to teach the above. The motivation for this is to teach a financial management software program which has different object classes.

\*\*\*\*\*

32. Claims 2,4,10,13-14,19,22,25,31-33,35,37,39-41 are rejected under 35 USC 103(a) as unpatentable over Maggioncalda(US Pat. No: 5,918,217) in view of Minton(US Pat. No: 6,014,643).

33. As per claim 2 Minton teaches a personal financial management software program according to claim 1, wherein each object is derived from an object class selected from the group consisting of an account class(Fig 7/718), a transaction class(Fig 4/418/426), a category class(Fig 7/726/718) and a template class(Fig 4). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial management software program which has diverse object classes.

34. As per claim 4 Minton teaches a personal financial management software program according to claim 2, wherein the transaction class comprises objects selected from the group consisting of account/account transaction objects, account/category transaction objects, account/transaction transaction objects, category/transaction transaction objects, and close account transaction

Art Unit: 2164

objects(Fig 4)(Fig 7).It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

35. As per claim 10 Minton teaches a personal financial management software program according to claim 1, further comprising cash objects used by transaction objects for tracking cash flows(Fig 12/1228/1226/1224/1222).It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

36. As per claim 13 Minton teaches a personal financial management software program according to claim 2, further comprising category data from other financial programs imported into category objects(Fig 4/425/412).It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

37. As per claim 14 Minton teaches a personal financial management software program according to claim 1, further comprising a programming means for enabling the user to create and incorporate a custom object wherein each custom object is derived from an object class selected from the group consisting of an account class(Fig 7/718), a transaction class(Fig 4/418/426), a category class(Fig 7/726/718), and a template class(Fig 4).It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach

Art Unit: 2164

the above. The motivation for this is to teach a financial managment software program which has different object classes.

38. As per claim 19 Minton teaches a method according to claim 18, wherein the objects belong to object classes comprising an account class(Fig 7/718), a transaction class(Fig 4/418/426), a category class(Fig 7/726/718), and a template class derived from a time/value class(Fig 4/430).

It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

39. As per claim 22 Minton teaches a method according to claim 18, further comprising tracking cash flows by cash objects used by transaction objects(Fig 12/1228/1226/1224/1222). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

40. As per claim 25 Minton teaches a method according to claim 19, further comprising importing category data from other financial programs into category objects(4/425/412). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

41. As per claim 31 Maggioncalda teaches a computer-implemented method for personal financial management, comprising the steps of creating, manipulating, and displaying objects of

Art Unit: 2164

object-oriented software programs by a graphical user interface(col 2 lines 32-34). Minton teaches entering data into objects belonging to an account class(Fig 7/718), a category class(Fig 7/726/718), and a transaction class(Fig 4/418/426) based on past, current, and projected financial transactions; defining objects belonging to a template class that associate common activities to a financial transaction comprising objects of an account class(Fig 7/718), a category class(Fig 7/726/718), and a transaction class(Fig 4/418/426) and simulating financial activity due to all objects representing financial transactions from the earliest past date to the latest future date entered(col 18 lines 26-38). Minton teaches tracking cash flows by use of cash objects (Fig 12). Maggioncalda teaches identifying and graphically depicting discrepancies and shortfalls in the simulated transactions(col 9 lines 1-7)(Fig 7a/715/720/710/705) and comparing current financial data with projected financial data based on objects representing financial transactions and adjusting object data to eliminate and minimize discrepancies and shortfalls, and to provide a more accurate fit with actual financial activity(col 41 lines 15-48) and displaying a to-do list for prompting the user to initiate planned actions(col 17 lines 3-33). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

42. As per claim 32 Maggioncalda teaches a computer software program contained on a computer-readable medium incorporating the method recited in claim 31(col 6 lines 28-49).

Art Unit: 2164

It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial management software program which has different object classes.

43. As per claim 33 Maggioncalda teaches a computer(Fig 1) programmed to perform the steps in the computer-implemented method as recited in claim 31. It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial management software program which has different object classes.

44. As per claim 35 Minton teaches a personal financial management system according to claim 34, wherein the objects belong to object classes comprising an account class(Fig 7/718), a transaction class(Fig 4/418/426), a category class(Fig 7/726/718), and a template class derived from a time/value class(Fig 4). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial management software program which has different object classes.

45. As per claim 37 Minton teaches a personal financial management system according to claim 34, further comprising cash objects used by transaction objects for tracking cash flows(Fig. 12/1228/1226/1224/1222). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial management software program which has different object classes.

Art Unit: 2164

46. As per claim 39 Maggioncalda teaches a personal financial management system according to claim 35, further comprising account data from other financial programs imported into account objects(Fig 3/310/320/330/350/340/360).It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

47. As per claim 40 Minton teaches a personal financial management system according to claim 35, further comprising category data from other financial programs imported into category objects(Fig 4/425/412).It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

48. As per claim 41 Minton teaches a personal financial management system according to claim 34, further comprising a programming means for enabling the user to create and incorporate custom objects into the personal financial management software program(Fig 7)(Fig. 4). It would have been obvious to one skilled in the art at the time of the invention to combine Maggioncalda in view of Minton to teach the above. The motivation for this is to teach a financial managment software program which has different object classes.

Art Unit: 2164

*Conclusion*

49. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Libman teaches an apparatus for transacting marketing of financial products

-Belzberg teaches a computerized stock exchange trading system

-Jones teaches a financial advisory system

-Martyn teaches on-line transaction processing for security trading

-Coutts teaches a financial transaction system

-O'Shaughnessy teaches automated strategies for investment management

Questions regarding this communication should be directed to the examiner, Dr. Geoffrey Akers, P.E., who can be reached at (703)-306-5844 between the hours of 6:30 AM and 5:00 PM Monday through Friday. If attempts to contact the examiner are unsuccessful, the examiner's supervisor, Mr. Vincent Millin, SPE, may be telephoned at (703)-308-1065.
